### 1 GENERAL

The holder part of the AGS will mechanically fit the AGS-house to the refiner stator plate. There are several types of holders for different lengths, threads and sealing. The AGS-SP-SB170-HE will fit the AGS in an Andritz SB-170 refiner.

The holder is included in a new AGS sensor but can also be bought as a spare part. The holder is replaced if the thread is damaged, if the sealing surface has become damaged or if the contact surface to the segment plate is damaged.

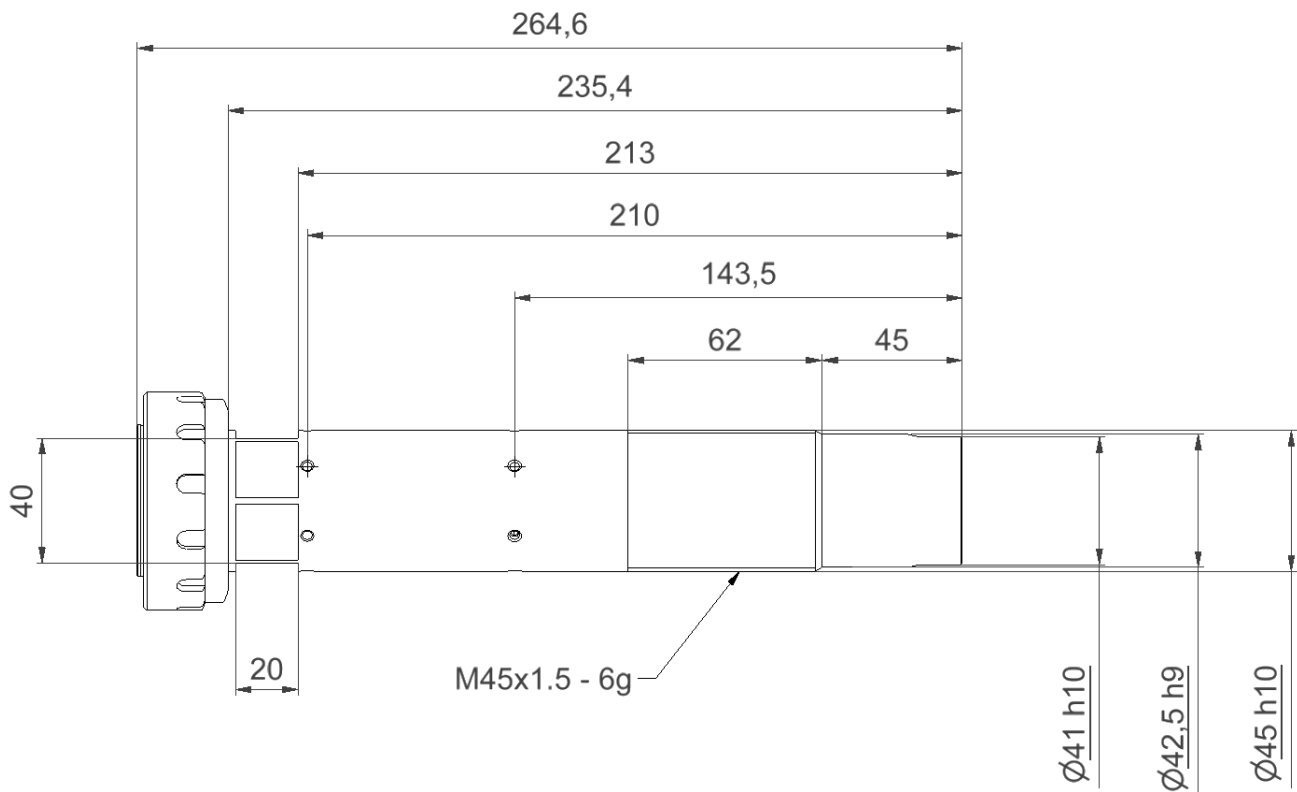

### 2 SEALING

The inside of the holder is used as a sealing surface to the sealing on the sensor tip. Special precaution must be used when cleaning the inside surfaces – use only a soft cloth.

### 3 MOUNTING

The holder is mounted directly to the AGS house and the sensor tip must be mounted afterwards. Use the 'Holder exchange' wizard on the Panel-PC to mount or dismount the holder and tip. Tight the locking nut when the AGS sensor is tightened toward the refiner plates.
